

CASE STUDY

L Pickering and Sons save time with Kelio's combined Time and Attendance Pro, Payroll Interface and Employee Self-Service solution!

Commentary by Si Mepstead, Production Support Manager at L Pickering and Sons

L Pickering and Sons were looking for an update to their clocking in machines and wanted a system that was future proof. They fitted Kelio's Time and Attendance Pro, Sage Paylink and Employee Self-Service as well as adding on Kelio's Access Control more recently to their manufacturing plant. They have had no problems and the solution Kelio provided has more than fitted their requirements.

Si Mepstead discusses the benefits of their new all-in-one solution, 'it is good for displaying patterns in annual leave; our production manager can see in advance what is happening.' He comments further about time saved for the staff, 'our payroll team have gained a day back. It is easy to administer and made a key member of staff's life much easier'.

With varying job types and roles for the company specialising in perforated and expanded metal products, including the administration team, press operators and manufacturing team, keeping up-to-date with annual leave and ensuring productivity is maintained is crucial. Having all of the information instantly accessible with an overview and well as personal profiles for staff makes the day-to-day operations much smoother. Kelio's Employee Self Service module enables employees to see their schedules themselves and request time off effortlessly via a phone and computer.

With Kelio's support staff on hand, L Pickering and Sons had no issues getting used to the software. Si reports, 'Technical support are fantastic and answered our queries very quickly. The people we have spoken to have been more than helpful and bent over backwards to help us. They couldn't do enough for us.' This has provided the company with reassurance and confidence going forward for expanding their range of solutions. They are looking forward to Access Control being fitted and linked to their existing system. Kelio's Access Control terminals will enable the company to assign access based on roles, track who is on site in real-time and provide full reports saving further time.
